

MPT: Summary of Important Concepts

January 16 2021

What are the discussions?

Third Quarter

1. C1 Lesson 1: Understanding Culture, Society, and Politics: Some Key Observations
2. C1 Lesson 2: Social Sciences: Sociology, Anthropology, and Political Science
3. C2 Lesson 1: The Interpretive Dynamic of Society

Explain exactly what the discussion was about?

Third Quarter

1. This lesson was about understanding how the concepts of culture, society, and politics are interconnected and how they make up what we know as society.
2. In this lesson, we discussed about the different fields of social sciences: sociology, anthropology, and political science.
3. In this lesson, we dove deeper into our discussion about society, about its origins and etc.

What are your insights/learning?

Third Quarter

1. There was a lot of stuff we already know that we could relate to the lesson, and even more we can that we just haven't discussed.
2. Studying society is a bigger world than what I used to think it is, it's amazing and haunting for me as a student.
3. Society can be interpreted in a lot of different ways, and I kind of like this vibe, I like analogies.

Which of the discussions you did well? Why?

Third Quarter

I'm gonna be honest now, I didn't do well in much of the discussions. I had to look down at the hand-outs to clarify the terminologies for myself. I think I did well with participating in the discussions though. Probably because I'm more of a two-way communicator (if that's a thing), and a self-learner (which I am).

In what discussion you have to improve? How?

Third Quarter

I have to improve in being a good listener, and I think I can do that if I take notes while the discussion is running, which I'm not so good at. I'd better do better next quarter, because that's then or never.
