

Task 7: Research Design and Sampling

March 23 2021

Proposed Topic

Optimal Learning Strategy for Learning Python: A Qualitative Study on the Optimal Learning Strategy for Python Learners.

A. **Research Design:** Case Study

Justification:

This study utilizes the qualitative type, since it is expected that we will

B. **Population and Sampling**

Size of the Population	50 – 75
The approach used to determine the sample size	Universal Sampling
Sample size for the study	50 – 60
Sampling procedures to be employed	Universal Sampling Location: Around the Internet
Respondent of the Study	Well-known reliable Python developers in the internet
