Mini Performance Task 2 (Part 2)

February 21 2021

Ahmad Badron
8156 17th Street
Al Khobar Al Janubiyah, KSA

To the Selection Committee:

My name is Ahmad Badron and I am a high school senior in the International Philippine School in Al Khobar, KSA. By the summer of 2022, I will be starting my freshman year at the Mindanao State University with an intended major in Mathematics, and also intending to go down a Computer Science path.

I have studied my high school years in different schools and environments, so I can adjust pretty well to any environment. I joined the Robotics Club in my freshman year in IPSA as a high school junior, which is where my interest in programming sparked. In my 3rd year of junior high school, we were met with the C++ programming in our computer class and got me going into programming and exploring other programming languages. As I have traversed different programming languages and different fields, I can quite confidently say I have learned the basic fundamentals of programming and have gotten pretty familiar with various languages, to add.

I have strong feelings about going down a career path in the Computer Science industry. And I can tell you I am very passionate about it. I want to find solutions to problems that people might never known they had. I also want to find ways to make everyday life more convenient for anyone who needs it.

I still have so much more room to grow and learn more, and that is why I want to focus on school. As we all know it college fees usually tend to be high, and although my parents work abroad, I still want to help them with the expenses that they already have there. This scholarship would help me achieve that and lessen the temporary burden on my family.

I'd really love to contribute as much as I can offer to Mindanao State University, and hopefully graduate with the pride of the University. It'd be my pleasure to receive a scholarship. Thank you for your time and attention, I look forward to your response.

Sincerely,

Ahmad Badron
